Indian Peroxide Unveils India's First Food Grade Hydrogen Peroxide Solution at World Dairy Summit 2022

New Delhi, 15 October 2022: The four-day long IDF World Dairy Summit 2022 concluded on 15th September, 2022. World Dairy Summit 2022 saw a gathering of international professionals from the dairy and packaging industry. The summit was inaugurated by Indian PM Narendra Modi along with Chief Minister of Uttar Pradesh, Yogi Aadiya Nath at India Expo Mart, Greater Noida.

India has been at the front in terms of producing and consuming dairy products. The event saw participation from 114 companies along with top brands from dairy and packaging industry like Tetra Pak, Amul, Mother Dairy, SIG and etc.

Sanjeev Balyan, Minister of State for Development in Animal Husbandry, Fisheries and Dairying at IPL Stand in IDF World Dairy Summit, 2022

Mr. Sanjeev Balyan, Minister of State for Development in Animal Husbandry, Fisheries and Dairying along with Mr. Dharam Pal Singh, Minister of Animal Husbandry & Milk in the Indian state of Uttar Pradesh government visited Indian Peroxide Limited (IPL) stand. “The revolutionary products of IPL can revitalize the Indian packaging and food processing industry as it helps in sustaining the texture, color, nutrition value and odor of the food items,” said Mr. Balyan.

Nomusa Mugwambi, the trade counselor at the Embassy of the Republic of Zimbabwe at IPL Stand in IDF World Dairy Summit, 2022

Nomusa Mugwambi, the trade counselor at the Embassy of the Republic of Zimbabwe to India showed a deep interest in collaborating with IPL for various business opportunities in Zimbabwe. She commented “IPL can significantly contribute to improving food security infrastructure in Zimbabwe. IPEROX can help in improving the issue of food wastage as it extends the product shelf life.”

With an aim to provide a solution for safer packaging IPL unveiled innovative product range for Food Grade Hydrogen Peroxide. IPL manufactures various food-grade hydrogen peroxide products like TETRA, COMBI, MIST and FG under the product brand name of IPEROX. IPEROX Tetra is one of the high-quality product

in the category which has been validated by the world's largest packaging & processing company. "I am delighted to share that we are the only company in India to manufacture Food Grade Hydrogen Peroxide. We develop Food Grade Hydrogen Peroxide from modern, cutting-edge Swedish technology. Our exceptional hydrogen peroxide chemical solutions can increase the food shelf life by approx 6-12 months without storing the food in refrigeration. IPL has followed regulatory norms with its food grade H_2O_2 products certified with BIS, FSSAI, ISO & Halal standards," said company's Managing Director, Mr. Amit Tyagi.

Indian Peroxide Officials Unveiling Food Grade Hydrogen Peroxide

In the exhibition, the company also presented its hydrogen peroxide products in technical grades of 35%, 50%, 60%, 11%, 40%, 30%, 25%, 6%, and 3% which can be used for more than 10 industries including textile, pharmaceutical & healthcare, specialty chemicals, aroma, paper & pulp industry and etc.

To meet the demand Indian Peroxide Ltd. is in the process to double its production capacity from 150 TPD to 300 TPD. This will add value to the 'Make in India' concept and will set a new milestone in the food-grade hydrogen peroxide industry in the world.
